Adobe Express for Education

Accessing Adobe Express through your Clever portal.

Adobe Express is the free web and mobile app that lets educators and students easily create stunning graphics, flyers, photos, presentations, web pages, and videos. Built with privacy and safety in mind, the app offers safe search for images and videos plus sharing restrictions. And now that Adobe Express integrates with Clever, it's even easier for educators and students to dive in and start creating.

The power of Adobe Express and Clever, together.

Adobe Express is accessible via Single Sign-On (SSO) through your district's Clever portal. Once a student or teacher logs in to Clever, they can simply click the Adobe Express tile in their portal and go directly to their account—no need for multiple usernames and passwords. Save valuable class time and help your students start building creative problem-solving skills right away with instant access to Adobe Express.

Granting access to Adobe Express through Clever.

Follow this two-part process to grant your students and educators access to Adobe Express through their Clever portals:

1. In the Clever App Library, add the "Adobe Express SSO" app to your dashboard. You'll find directions on the Clever site.
2. Enable SSO through the Adobe Admin Console by adding Clever as a secondary Identity Provider (IdP).

Start creating with Adobe Express.

Here's a glimpse of what you and your students can make with Adobe Express:

- **Graphics**—Design impactful graphics, collages, and infographics for posters, book covers, vocabulary flash cards, and math explanations.
- **Web pages and presentations**—Create beautiful essays, lab reports, field journals, and club newsletters with text, images, and videos.
- **Short videos**—Make narrated videos for class presentations, book reports, science explanations, and group projects.
