

Corel Education Licensing Program

Teach the fundamentals with Corel software

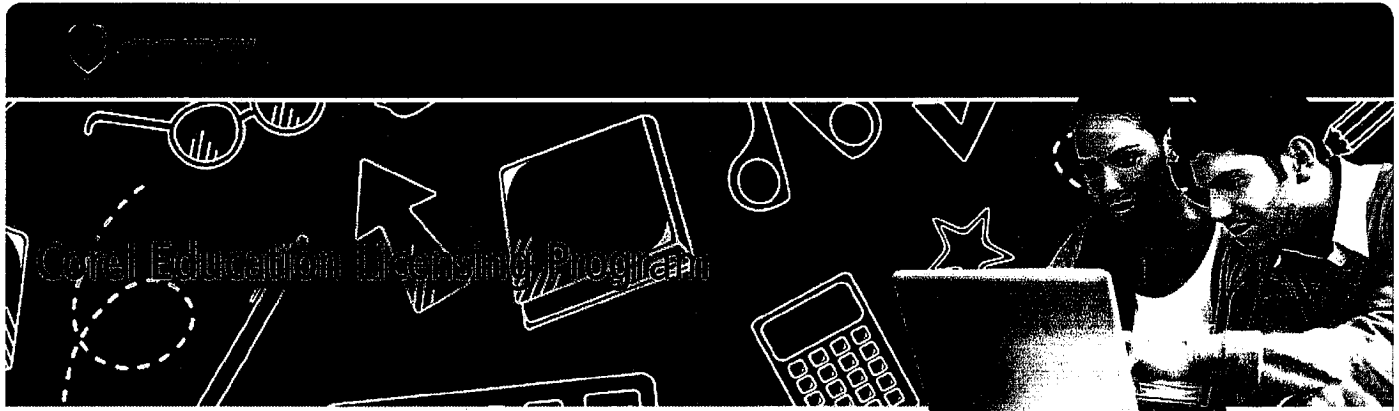

Corel offers a wide range of digital media, graphic design and productivity software that allows educators to prepare students for success in today's technology-driven world.

Worried about students learning new software? The workspaces in many Corel products can be customized to recreate the workspaces found in products from Adobe and Microsoft, resulting in a seamless transition for students looking to work with Corel software.

Corel Product	Function
CorelDRAW® (Included in CorelDRAW® Graphics Suite)	Graphic design and vector illustration
Corel® PHOTO-PAINT™ (Included in CorelDRAW Graphics Suite)	Photo editing and photo manipulation

More Flexibility, More Sales

Corel knows that times are tough and customer's budgets are tighter than ever, often translating into fewer sales opportunities and lower profits. Which is why we've listened to the concerns from our channel partners and are pleased to offer our NEW Education Licensing Program which offers a wide range of powerful photo, video and graphics software, with **prices starting at just dollars per seat**. This flexible and economical program provides software to suit the budgetary needs of any academic customer. Saving your customers money not only helps free up their budgets to spend on other academic necessities, but helps increase your overall sales at the same time.

Corel's NEW Education License Program offers:

- ✓ Deal registration program
- ✓ Competitive pricing to address budgetary concerns
- ✓ Products that promote fundamental learning
- ✓ Exclusive take home rights for customers
- ✓ A wide-range of curriculum to choose from
- ✓ Video tutorials on YouTube and Corel.com
- ✓ Comprehensive online help
- ✓ Bigger sales margins for Corel channel partners

PHOTO & VIDEO

Corel® VideoStudio® and Corel® PaintShop® Pro lets students work with the latest photo and video-editing technology. It's the perfect solution for media-rich projects such as digital storytelling and the flipped classroom. With Corel's versatile video and photo-editing tools, students can share their stories, learn new technologies and develop key visual communication skills.

“ When I started my digital design and graphics program, I of course considered the Adobe suite of products. After looking at all of the factors, **it was an easy decision to go with Corel.** I don't teach software, I teach students fundamental skills, and I've been able to keep my program running and funded for several years now for less than a single year's cost of the competition.”

— Allen Brooks, Technology Teacher
San Elijo Middle School

GRAPHICS

CorelDRAW® Graphics Suite and CorelCAD™ lets students learn website creation, print design, Flash animation, 2D technical drawing, 3D modelling and more. Corel® Painter™ is also the world's leading digital art software, offering a realistic painting experience without the need for costly supplies. With Corel's affordable line of graphics software, students can master the creative essentials, learn new technologies and achieve their full potential.
