

All in one: Together for greater digital inclusion.

Knowledge is a human right. Make education accessible for all. With Eye-Able.

The education sector is becoming increasingly digital. Eye-Able improves the usability of websites for everyone.

These are your benefits:

- You will allow your users to customize web content to meet their individual needs
- You can use the service on any HTML-based system
- Auditing software highlights all of your WCAG errors and provides solutions to these issues
- Reports can be generated and sent to all staff
- WCAG- and ADA-testing made easy
- You will address the needs of people with visual, cognitive and motor disabilities

GO ALL IN.

To empower everyone.

What makes Eye-Able so unique?

From the beginning, the company has worked closely with people with disabilities and related institutions. This goes back to the founding history of Eye-Able. Oliver, one of the founders, was confronted early in his life with the problems that a disabled person can have: His best friend Lennart can only see about 10 per cent due to a genetic vision defect. He has always struggled with the usability of websites. The university he was in could not adapt to his individual needs, and he had to break down his studies. And we are sure that there is a person like Lennart in every university around the world. This got Oliver thinking about solutions to his friends' problems.*

These are the features that Eye-Able offers:

Eye-Able Assist

- Assistive software that adapts the usability of your online systems to the individual needs of your users
- Over 25 accessibility features, such as text-to-speech or contrast modes
- Build with and for people with disabilities

Eye-Able Report

- Dashboard for cross-domain analysis and reporting of current compliance status
- Scans your systems for WCAG compliance on a regular basis
- Allows you to analyse and report on PDFs (for WCAG and PDF/UA conformance)

Eye-Able Audit

- On-the-fly WCAG compliance testing software for online systems
- Unlimited number of licences, no crawling limits
- Export test reports in all common formats possible (CSV, XLS, JSON)
