Cintiq® 22HD

interactive pen display

22HD

wacom®

WORK DIRECTLY ON SCREEN

The new Cintiq 22HD features a 1920 x 1080 HD display that incorporates Wacom's most advanced pen technology in a 21.5" display, allowing photographers, designers, animators and other creative professionals to work naturally and intuitively directly on the surface of the LCD screen.

ULTRA-SENSITIVE

The Cintiq 22HD detects the pressure you exert with the pen and gives you exact control of effects such as line weight, opacity and exposure.

THE FANTASTIC FOUR

Take control of up to four functions – including brush size, zooming, canvas rotation and scrolling – in each of your applications with the rear-mounted Touch Strips and Touch Strip toggle buttons.

TIP SENSOR

The professional Wacom Tip Sensor features a lower activation force, capturing even the most subtle nuances of pressure.

HIGH DEFINITION
Work directly on-screen with this 21.5" HD (1920 x 1080) display, which delivers a high-quality visual experience along with plenty of room to edit, design and create.

WORKING UNDER PRESSURE
Dynamically adjust the exposure, brush size and line weight simply by varying the pressure of the pen on the screen. You'll feel just like you're working with a traditional paintbrush, marker, pen or pencil. There is also a programmable eraser on the back of the pen.

RECLINES FOR COMFORT
The Cintiq 22HD reclines from 10° to 65°, allowing you to find your most comfortable working position. You can also easily remove your Cintiq from the stand and mount it on an articulating arm (not included).

CHANGE YOUR POINT OF VIEW
In addition to reclining, the Cintiq 22HD freely rotates up to 180° in either direction to accommodate your arm's natural drawing movements or to quickly change your viewing angle.
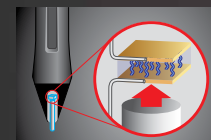

AT YOUR FINGERTIPS
All 16 ExpressKeys™ are customizable, giving you handy access to application-specific keyboard shortcuts and modifiers. The Show Settings key displays your current key settings on-screen.

CUSTOM CONTROL
The Grip Pen has customizable side switches that allow you to program common functions into the pen itself. In addition, you can vary the effects created by your pen by simply changing the angle of your stroke.

WACOM TIP SENSOR
Featuring Wacom's Tip Sensor, the Grip Pen allows you to capture the most subtle nuance of your stroke, beginning with only a single gram of pen pressure.

TRUE VALUE
The Cintiq 22HD combines two powerful tools in one – an extra-large professional pen tablet and a high-quality monitor. The result is a tool that helps you work faster and more naturally.

CONFIDENCE
With Wacom's 25+ years of experience as the industry leader in pen tablets and interactive pen displays, and a knowledgeable United States-based Customer Care team, you can have confidence in your purchase decision.
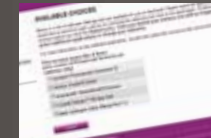

ACCESSORIZE
To complement your Cintiq, choose from a variety of accessories, including alternate pens (Art Pen, Airbrush and Classic Pen), pen nibs and other replacement parts.

MAC OR PC
Compatible with both Mac and PC platforms, the Cintiq 22HD requires AC power and video (VGA or DVI) plus a USB connection to your laptop or desktop computer.
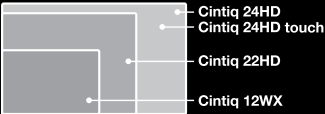

CREATIVE SOFTWARE
Cintiq comes bundled with downloadable, valuable creative software from leading software manufacturers.

Explore your options.

With four sizes to choose from, Wacom has a Cintiq interactive pen display to suit your workflow needs.

Interactive pen display options for different workflows and budgets.
