

Adobe Creative Cloud for education deployment

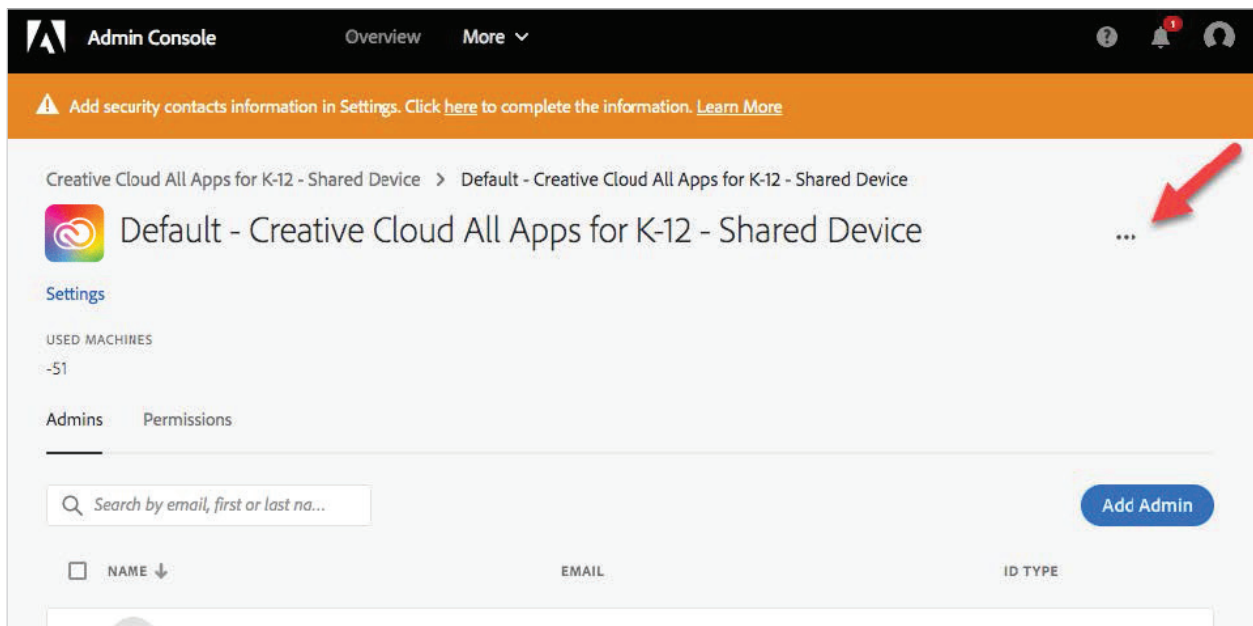

Migrating to a new VIP agreement

If you are moving from one VIP with Shared Device licenses (SDL) to a new VIP that will also have Shared Device licenses, you must uninstall and deregister each device.

1. Get prepared for the move

Verify which devices will need to be changed over by running a report in your Product Profile(s).

For each SDL Product profile, click on the profile name and select the three dots in the upper right to **Create Report**. That Microsoft Excel file will list all machines for that profile that are registered/have SDL installs.

Locate the original package installed on the machine.

The report you have just created will note the package name associated with the device. If you do not have the original package—DO NOT PANIC! There is an alternative workflow for removing the software and deregistering the device.

	A	B	C	D	E	F	G
1	Licensed On	Activation Status	Machine DNS Name	IP Address	Package ID	Package Name	Active Directory OU
2	2019-12-17T	SUCCESSFUL	HCPS-HCHS-04881	10.70.96.250	3FE69A89-9BA3-4993-80EC-3E06A24213E9	HCPS_CTE_AdobeCC_WINx64	
3	2019-12-17T	SUCCESSFUL	HCPS-HCHS-04882	10.70.96.251	3FE69A89-9BA3-4993-80EC-3E06A24213E9	HCPS_CTE_AdobeCC_WINx64	
4	2019-12-17T	SUCCESSFUL	HCPS-HCHS-05020	10.70.96.252	3FE69A89-9BA3-4993-80EC-3E06A24213E9	HCPS_CTE_AdobeCC_WINx64	
5	2019-12-17T	SUCCESSFUL	HCPS-HCHS-04883	10.70.99.10	3FE69A89-9BA3-4993-80EC-3E06A24213E9	HCPS_CTE_AdobeCC_WINx64	
6	2019-12-17T	SUCCESSFUL	HCPS-HCHS-04884	10.70.96.139	3FE69A89-9BA3-4993-80EC-3E06A24213E9	HCPS_CTE_AdobeCC_WINx64

8	2019-12-18T	SUCCESSFUL	hcps-cte-0521	10.80.96.24	3FE69A89-9BA3-4993-80EC-3E06A24213E9	HCPS_CTE_AdobeCC_WINx64	CN=hcps-cte-0521,OU=Lab_B114,OU

Remember:

You will have to release/delete your domain and directory in the Settings tab and [set up your identity](#) in the new agreement OR establish a directory trust to the old VIP. The latter is not recommended if you will no longer be using the old VIP.

2. You will need to perform the following actions on each machine. There is currently no bulk deactivation/package removal feature:

Windows:

- A: Uninstall each app from "Add/Remove Programs"
- B: Download Licensing [toolkit](#) and run: adobe-licensing-toolkit –deactivate

Mac:

- A: Uninstall apps with: Run the uninstaller for each app under /Applications/Utilities/Adobe Installers/
- B: Download [toolkit](#) and run: sudo adobe-licensing-toolkit –deactivate

If you are moving from a VIP with Named User or Device licenses to a VIP with SDL:

- Fully uninstall all Adobe products from the device, and...
- Create a new application package for SDL in the new VIP and deploy that to the machine.
- Review the support documents on the Deployment Landing Page for uninstallation and new package recommendations.
