# Adobe VIP shared device licensing.

Adobe Creative Cloud shared device licensing gives your students and educators access to the world's best creative apps and services in shared environments like labs, libraries, and classrooms. And best of all, schools that currently have device licensing can migrate to new shared device licenses at no additional cost.

This summer is a great time to migrate with less demand from students and educators. To make sure your migration goes smoothly, check out this toolkit of resources before you get started.

Preparing for migration video bytes

Why the change to shared device licensing?
Key benefits of shared device licensing for both end users and IT.

Comparing license types
Differences between Adobe Creative Cloud device licensing and shared device licensing.

Migrating the Adobe Admin Console
Overview of the Console migration process and what changes to expect in your Admin Console.

Steps to migrate from device to shared device licensing
Review of all of the steps that will need to be taken to migrate from device to shared device licensing and using your Spark entitlement to set up your identity before you migrate.

Completing the set-up: profile permissions
Overview for setting permissions and identity, and managing users.

Completing the set-up: identity set-up
Overview for setting up identity using enterprise or federated IDs.

ID types
Overview of identity types: Adobe, enterprise and federated IDs.

Azure Connector
Workflow for the Microsoft Azure AD connector, tool which syncs Azure to the Admin Console.

Google Connector
Workflow for the Google Connector tool, which syncs Google to the Admin Console.

Directory Trusting
Workflow for a Directory Trust, which can occur during identity set up if another organization owns the domain.

Completing the set-up: managing your users
Overview for how to bring users into the Admin Console and manage access.

Packaging—comprehensive
Workflow for creating and deploying packages for shared device licensing.

Support resources for migration
Review of support options and topics in the Admin Console, deployment resources, expert sessions, and more to help make sure you have a smooth migration experience.

New features in the Admin Console
Overview of multiple profile support for device management, assigning admin roles, adding licenses, and recovering licenses.

Upgrading your shared device licensing to access new features
Update shared device licenses from version 1.0 to 1.5 using the Adobe Licensing Toolkit.
